Jeanenne Bell at her best, sharing her impressive understanding of the subject with unbridled passion for her life-long pursuit. Offering significant historical information and lavish images of remarkable pieces, this best-selling guide to antique jewelry takes you on a beautiful and edifying adventure. Bell's historical sense, coupled with her keen eye for detail and value, makes her work a cherished addition to the library for both the beginning or veteran jewelry collector. This new edition features nearly 1,000 all-new color photographs of the most collectible jewelry today from 1840 to 1950, fully vetted values, and offers indispensable insight for various jewelry styles, including: • Victorian • Edwardian and Egyptian Revival • Art Nouveau and Art Deco • Retro Modern • Bakelite, Costume, Mexican and Modernist A former appraiser for "Antiques Roadshow," Bell also provides additional information on maker's marks, trademarks, designer marks, and circa dating clues. Professional secrets of jewelry making are revealed in a thorough, practical guide. Over 200 illustrations. "How to Enamel" by Howard M. Chapin. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten or yet undiscovered gems of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format. An on-the-page gallery is illustrated with hundreds of photographs of work by more than three hundred international contemporary artists, including Harlan W. Butt and David C. Freda. Provides an overview of the basic equipment and techniques needed to work with traditional materials as well as plastic and acrylic. All those concerned with goldsmithing, silversmithing, rare metal objects, or metal scientific instruments, or their repair or restoration will be delighted to find this bible of their craft available again in a new edition. And those interested in such work as one of the most rewarding of all avocational arts can hardly find a better guide. For this is the professional's handbook — the standard text on the subject. The author, who, among his other achievements, was responsible for reconstruction work on the Sutton Hoo treasure in the British Museum (and was awarded the Order of the British Empire for his work), treats every aspect of the craft in detail, from basic tools to casting and enameling in separate sections. After discussing materials and tools, he provides a treatment of soldering in rare metals that is more extensive, more thorough, and richer in practical advice than can be found elsewhere. He continues into filigree work, the setting of stones, raising and shaping, spinning, repoussé work, wire twisting, hinges and joints, inlaying and overlaying, niello, alloys and stratified fabrics, enameling (including cloisonné, plique-à-jour, champlevé, bassetaille, encrusted and painted enamels), metal casting, construction, setting out, polishing and coloring, design, and assaying and hallmarking. Wherever possible, he analyzes examples of fine craftsmanship, ancient and modern, to illustrate practical aspects of the process he is explaining. Helpful hints are included on shop set-up and safety. The vastness of the author's experience in the actual work, with his authoritative knowledge of the entire field, ensures that readers of Metalwork and Enamelling are being advised and guided by a renowned expert. Over 300 figures and photographs amplify the discussion of tools, materials, and construction. Tables and standards useful to the craftsman (melting points and weights of metals, for example) are included. Notes to the photographic plates describe the objects in detail — magnificent examples of craftsmanship throughout the ages. Both complete and concise, this book belongs close to every rare metals workshop, laboratory, museum shop, and craft center. A standard reference for beginning and advanced jewelry makers. Describes materials, tools, and basic techniques as transferring designs to metal, cutting, stamping, soldering, pickling, coloring, polishing, and applying fittings and findings. Hundreds of photos and drawings by various artists and their work included. The wonderful world of enameling—fusing glass to metal under high-temperature conditions-- is diverse! Practically anything made from enamel-friendly metal can be enameled, from vases to jewelry to buttons to metal mesh and solid forms. In the first edition, published in 2002, Cohen explored this world as it was then, but so much knowledge has been gained in the last 17 years that it was definitely time for an update! Every chapter and project has been completely reviewed, revised, and updated; it's a whole new book, and one you will want in your reference library. The look and organization is updated, 15 years of experience has been added, about half the projects have changed, and two types of mini-projects to expand your learning experience are included. In addition, each project has a gallery of the work of other artists working in the same technique, to give a view of other ways a technique can look and be used. Classic techniques such as champlevé, cloisonné, and plique-à-jour each have projects, as do newer approaches such as the use of graphite pencil and enameling on steel—21 project lessons in all. And you will find the extensive troubleshooting chapter indispensable.
